THANK YOU FOR YOUR ORDER

Heavy Duty Workbench

Safety Instructions

Notice: Ensure you read and fully understand instructions before use

While every attempt is made to ensure the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, which no representative of the company can waive or change.

- This product is not a toy and should only be used for its designated purpose.
- Make sure that the racking platforms are secure before applying any weight to the product.
- This product can be used both indoors and outdoors.
- Leaving the product outside exposed to weather, especially direct sun, rain and salt air, will speed the weathering process. This can be slowed by removing the product from these conditions, or covering it with a suitable cover.
- Do not carry out alterations or modifications to this product.
- Do not discard any of the packaging until you have checked that you have all the parts and fittings required.
- When adjusting the height of the shelves, be sure that the shelving is securely held in place after adjusting the height to avoid it falling due to damage.
- **Never exceed the maximum load capacity of 175kg per shelf or it may result in product failure or personal injury.**
- Clean only with a damp cloth. Do not use strong industrial cleaning substances or abrasive materials as these will damage the product.
- If the product is damaged or has any defects, please contact cservice@oypla.com

Assembly Instructions

Parts List:

If you are missing any of the below parts please contact cservice@oypla.com

Please be aware that you will be referring to this parts list throughout the assembly process.

<p>Wooden Shelf</p>  <p>2pcs</p>	<p>End Adjustment Bar</p>  <p>4pcs</p>
<p>Side Adjustment Bar</p>  <p>4pcs</p>	<p>Plastic Feet</p>  <p>4pcs</p>
<p>Corner Support Bar</p>  <p>4pcs</p>	
	<p>4pcs Middle Support Bar</p>

1. Lay an end adjustment bar on the ground, ensuring the metal flaps are pointing upwards. After this, slide and secure a corner support bar into the metal flaps (seen in the image on the top left). Once done, put a plastic foot onto the bottom of the corner support bar. Repeat this on the opposite side (seen in the image on the top right).

2. Push a side adjustment bar into the corner support bar using the metal flaps on the side adjustment bar. Ensure that the metal flaps are held in place correctly. Repeat this for the other side. After both sides are in place, repeat the first step and attach that to the end of the side adjustment bars. See the image to the left.

3. Once the corner bars have been attached, attach the remaining end and side adjustment bars to the corner bars, to create the top layer. Lastly, slide the middle support bars across the two side adjustment bars so they are level with the shelves. Please see the red lines below to help with where they should go. Once the adjustment bars are secure, place the wooden shelves onto the created shelving layers.

Be sure that the wooden shelves are level once you've put them down to avoid items sliding across the shelf when they've been placed on it. The bottom shelf isn't necessary for the heavy duty workbench to be completed, however it is useful to store tools and other items.
