Safety Information

Please ensure you read and fully understand instructions before use

While every attempt is made to ensure the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, which no representative of the company can waive or change.

-
- Close supervision is necessary when the product is used by or near children. Do not allow children to use it as a toy.
 - Do not operate any product with a damaged cord or plug, or after the product malfunctions.
 - To reduce the risk of electric shock, do not immerse or expose the product or flexible cord to rain, moisture or any liquid other than those necessary for correct operation of the product.
 - Never operate electrical appliance in immediate vicinity of water sources.
 - Switch off or unplug from outlet when not in use and before cleaning.
 - Do not touch the surfaces or the hot plate when in operation.
 - Do not leave the product unattended when switched on.
 - Ensure the power supply to the socket into which the appliance is plugged, is in accordance with the rating label on the appliance and that the socket is earthed.
 - Do not discard any of the packaging until you have checked that you have all of the parts and fittings required.
 - Clean the painted surface with a damp soft cloth and mild household cleaning powder.
 - To clean the circular hot plate can be removed with household cleaning powder. Wait to cool down before cleaning.
 - Utensils with convex, concave or uneven bottoms should not be used.
 - This product is not a toy, and is only to be used for its designated purpose.
 - If the product is damaged or has any defects, please contact cservice@oypla.com
 - This product is for domestic use only.
 - **Warning! Leaving burnt food or residue on the glass hobs or the ceramic coating can create a risk of cracking. To prevent this, ensure spillages are cleared and no food is left on the product.**

Operating Instructions

The below information is designed to help you with the operation of your Oypla product

If the product is damaged, defective or you require more information, please contact our dedicated team at cservice@oypla.com.

Before First Use

Please note that before you use your hot plate for the first time, it is best to turn the hot plate on at the highest setting for 3-5 minutes, to condition the protective coating. You may notice an aroma; this is perfectly normal – it is the manufacturing oils.

Ideal Operation

For the most efficient usage of your hot plate, the diameter of the cooking utensils used should have a solid base with a diameter of approx. 18-20cm.

Controls

Turn the dial to the recommended position marked to achieve the desired temperature:

- 1 – For simmering of delicate foods and thickening sauces
- 2 – Slow cooking
- 3 – For simmering larger volumes
- 4 – To bring all dishes to a rapid heat
- 5 – To bring to a boil

Note that the indicator light will switch off when the hot plate reaches the desired temperature – it will then cycle on and off to maintain the temperature.
