

3 Way Multi Guitar Rack

Safety Instructions

Notice: Ensure you read and fully understand instructions before use

While every attempt is made to ensure the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, which no representative of the company can waive or change.

- This product is not a toy, and is only to be used for its designated purpose.
- Never carry out any alterations or modifications to this product.
- Before using the product, make sure all the fastening are tightly in place and that everything is in order, and checked periodically by an adult.
- Keep fingers, loose clothing, and hair away when folding the product.
- Never exceed the maximum load capacity of 30kg, or it may result in product failure or other item damage.
- Make sure all guitars are set apart evenly and aren't overlapping to avoid damaging the guitars when removing them from the multi guitar rack.
- This product is intended for indoor use only.
- Clean only with a damp cloth. Do not use strong industrial cleaning substances or abrasive materials as these will damage the product.
- If the product is damaged or has any defects, please contact cservice@oypla.com

Assembly Instructions

Parts List:

Please check you have all parts below before attempting to assemble this product.

If you are missing any of the below parts, please contact Oypla customer services:

cservice@oypla.com

<p>Large Screw</p>  <p>8pcs</p>	<p>Medium Screw</p>  <p>4pcs</p>	<p>Small Screw</p>  <p>2pcs</p>	<p>Nut</p>  <p>14pcs</p>
<p>Base Leg</p>  <p>2pcs</p>	<p>Rack Support Pole</p>  <p>2pcs</p>		
<p>Padded Guitar Rest</p>  <p>2pcs</p>	<p>Padded Racking Bar</p>  <p>1pcs</p>		

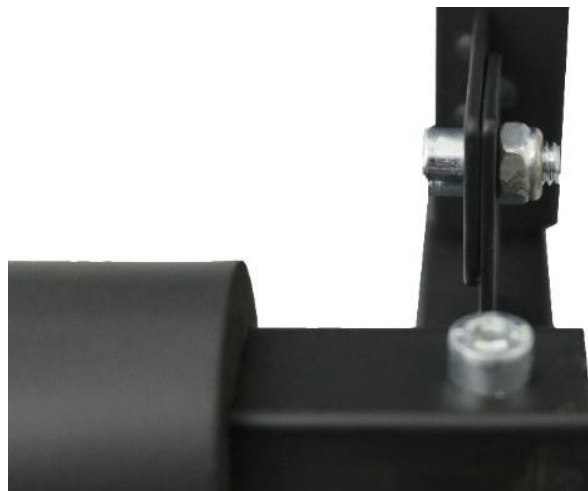

1. Place the base legs on the ground, ensuring that it is standing correctly. After this, take the padded guitar rest and lay it against the base legs (as seen in the picture on the top left).

2. Whilst holding the padded guitar rest to the base leg, insert a large screw and a small screw in the areas shown in the top right picture, securing them and the padded guitar rest in place by using two nuts.

3. On the other side of the padded guitar rest, ensure that the holes in the metal part of the padded guitar rest align with the holes in the base leg. Once they do, insert a large screw into the holes and secure the padded guitar rest and the base leg together using a nut. Repeat these steps on the back of the base legs.

4. Attach the rack support pole onto the back of the base legs by lining the holes in the sections (seen above in the top left) with each other. After this, push a small screw through the hole and secure the pieces into place using a nut. Repeat this with the other side.

5. Place the padded racking bar onto the rack support poles (ensuring that the holes in both line up with each other). Once they do, insert a large screw into the holes and hold the padded racking bar and one of the rack support pole together using a large screw on the top and pushing a medium screw through the rack support pole. Repeat this with the other rack support pole. Make sure that these are securely held in place before applying any weight to them.

6. Once you have completed the racking, go over all the screws and nuts to make sure that they are correctly tightened and are unlikely to come undone in the near future. When placing and taking guitars from the guitar rack, be careful not to use too much force as this could lead to the eventual damage of the guitar rack or the guitar itself.

Please retain a copy of all instructions for future consultation.
