

SIZE/NUMBER OF FINS MAY VARY

Oil Filled Radiator

USER MANUAL Model No: 3680, 3681, 3682, 3853

Safety Instructions

Notice: Ensure you read and fully understand instructions before use

While every attempt is made to ensure the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, which no representative of the company can waive or change.

- This product is not a toy, and is only to be used for its designated purpose.
- Never carry out any alterations or modifications to this product.
- This product is intended for indoor use only.
- When the appliance is not in use, always unplug from the mains socket.
- Only use this product on stable, level and dry ground. Be sure that the surface on which the heater is placed is also heat resistant.
- The product should only be operated by an adult and kept away from immediate contact with children. Some parts of this product can become very hot and cause burns. Particular attention has to be given where children and vulnerable people are present.
- The heater must not be located immediately above or below a power socket.
- Do not use the heater near sources of water (such as a bath or shower).
- The heater is filled with a specific quantity of special oil. Repairs requiring the opening of the oil container are to be made by the manufacturer, who should be contacted if there is an oil leak.
- When first using the product an odour may begin to develop. This is normal and will disappear.
- Do not allow foreign objects to enter the ventilation or exhaust openings as this may cause an electric shock, fire or damage to the appliance.
- This heater should be used in an earthed wall socket, but if an extension cord is needed then please ensure that you do not exceed
- This product is not intended for use by persons (including children) with reduced physical, sensory or mental capacities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the product by persons responsible for their safety.
- Clean only with a damp cloth. Do not use strong industrial cleaning substances or abrasive materials as these will damage the product. Make sure the product is off, unplugged from the socket and been left for five minutes to remove the risk of electrical shock.
- If the product is damaged or has any defects, please contact cservice@oypla.com

Operating Instructions

1. Turn the heater upside down.

2. Position the wheel base between the end fins.

3. Attach the wheel base to the heater using the U-bolts and wing nuts supplier.

4. Tighten the wing nuts.

5. Turn the heater the right way up.

WARNING:

Only operate the radiator in the normal upright position with the wheels attached to the bottom. Any other position could create a hazardous situation. If you are concerned when it comes to installing the product, please consult a qualified electrician.

Parts:

- | | |
|------------------------|-----------------|
| A. Oil filled fins | E. Power switch |
| B. Moving handle | F. Cord storage |
| C. Indication light | G. Wheel base |
| D. Temperature control | H. Wheels |

⚡ WARNING ⚡

To reduce the risk of fire, electric shock or injury to persons or property, please follow these basic precautions when using the heater.

- Read all the instructions provided before using the heater.
- Never allow children to operate or play with the heater.
- Never clean the heater parts with any flammable materials. The fumes can create a fire hazard or explosion.
- Do not store the product in the vicinity of gasoline or any other flammable vapours and liquids. The fumes can create a fire hazard or explosion.
- **UNPLUG OR DISCONNECT THIS HEATER FROM THE POWER SOCKET BEFORE SERVICING.**

Operation

1. Before turning on, ensure the heater is plugged into the socket, the power is switched to “0” and the thermostat is at the minimum setting.
2. Turn the power switch to “●” for minimal output, to “●●” for medium output, or “●●●” for maximum output.

Turn the thermostat knob clockwise the maximum position.

3. Once the room temperature is at a comfortable level, slowly turn the thermostat anti-clockwise until the indicator light goes out. The heater will then attempt to keep the room temperature at the desired level.
4. Do not cover the heater at any time during operation. There is a risk of fire if the heater is covered.
5. Once you have finished using the heater ensure that you turn the power switches off, and the thermostat control switch to the “0” positions. Then unplug from the mains supply.

Cleaning your Heater

1. Always disconnect the heater from the power supply before beginning to clean.
2. Clean the outside of the heater by wiping with a damp cloth and buff with a dry cloth.
3. DO NOT attempt to use any waxes or polishes as these may cause discoloration.

Storing your Heater

1. Save the box for the off season storage,
2. Clean the heater following the cleaning instructions above.
3. Remove the wheel base assemblies.
4. Place the heater and the wheel parts back into the original box and store in a cool and dry place.
5. If you wish to store the heater fully assembled, be sure to cover it to protect it from dust.

Please retain a copy of all instructions for future consultation.

Environmental Protection

Products bearing the symbol shown above means that used electrical and electronic equipment (WEEE) should not be mixed with general household waste. For proper treatment, recovery and recycling, please take this product(s) to designated collection points where it will be accepted free of charge. Disposing of this product correctly will help save valuable resources and prevent any potential negative effects on human health and the environment, which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point. Penalties may be applicable for incorrect disposal of this waste, in accordance with your national legislation.

Model identifier(s): 3680, 3681, 3682, 3853					
Item	Symbol	Value	Unit	Item	Unit
Heat output				Type of heat input, for electric storage local space heaters only (select one)	
Nominal heat output	Pnom	2.5	kW	manual heat charge control, with integrated thermostat	No
Minimum heat output (indicative)	Pmin	1.0	kW	manual heat charge control with room and/or outdoor temperature feedback	No
Maximum continuous heat output	Pmax,c	2.5	kW	electronic heat charge control with room and/or outdoor temperature feedback	No
Auxiliary electricity consumption				fan assisted heat output	No
At nominal heat output	elmax	N/A	kW	Type of heat output/room temperature control (select one)	
At minimum heat output	elmin	N/A	kW	single stage heat output and no room temperature control	No
In standby mode	eISB	0	kW	Two or more manual stages, no room temperature control	No
				with mechanic thermostat room temperature control	Yes
				with electronic room temperature control	No
				electronic room temperature control plus day timer	No
				electronic room temperature control plus week timer	No
				Other control options (multiple selections possible)	
				room temperature control, with presence detection	No
				room temperature control, with open window detection	No
				with distance control option	No
				with adaptive start control	No
				with working time limitation	No
				with black bulb sensor	No
