THANK YOU FOR YOUR ORDER

Triangle Hutch

Safety Instructions

Notice: Ensure you read and fully understand instructions before use

While every attempt is made to ensure the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, which no representative of the company can waive or change.

- This product is not a toy, and is only to be used for its designated purpose.
- Never carry out any alterations or modifications to this product.
- This product is intended for outdoor use only.
- Keep fingers, loose clothing, and hair away when putting the entrances into place and securing them.
- Make sure all fastenings are tightly in place and that everything is in order before using the product. This should be checked periodically by an adult.
- This product contains small parts that could be a choking hazard if swallowed. Keep these items away from children.
- If a pet is inside of the product, sure that the entrance panels are secured into place by the entrance latches before leaving the product on its own. Do not leave the pet alone inside the product as the weather conditions may change.
- Leaving the product outside exposed to weather, especially direct sun, rain and salt air, will speed the weathering process. This can be slowed by removing the product from these conditions or covering it with a suitable cover.
- Clean only with a damp cloth. Do not use strong industrial cleaning substances or abrasive materials as these will damage the product.
- If the product is damaged or has any defects, please contact cservice@oypla.com

Assembly Instructions

Parts List:

If you are missing any of the below parts please contact cservice@oypla.com

Please be aware that you will be referring to this parts list throughout the assembly process.

Parts

- | | |
|---|-------------------------|
| 1. Full Side Panel (with pre-attached metal connectors) | 7. Large Entrance Panel |
| 2. Divided Side Panel | 8. Small Entrance Panel |
| 3. Front Triangle Panel | 9. Entrance Latch |
| 4. Rear Triangle Panel | A. Large Screw |
| 5. Doorway Panel | B. Medium Screw |
| 6. Housing Base | C. Small Screw |

1. To begin, take both the full side panel and the divided side panel and rest one on top of the other, to create a triangular shape (as seen in the image to the left). Secure these in place using the small screws. Repeat this along the top of the hutch until the metal connectors have been secured into place.

2. After the side panels are connected, place the front triangle panel and rear triangle panel into the positions seen in the first image below. Secure these into place by screwing a large screw into the locations marked on the second image below. Repeat this on the other side to fully secure the hutch.

Large Screw

Large Screw

3. Next, place the housing bases into the house section. Place the one furthest away first, inserting it into the housing section at an angle that will allow it to fit. After this, place the housing base that is closest into the house section. Make sure that the housing bases are being held in place correctly to ensure they won't become loose easily once the hutch is in use.

4. To install the entrance latches, begin by placing the large entrance panel and the small entrance panel in the correct locations. After this, install the latches in the locations seen in both images above. Once done, secure these in place using the medium screws. Ensure that these are secured tightly to avoid them becoming loose.
