1. Place the 45 Key Safe against the surface you wish to mount it on and mark the holes in the safe onto the surface. \*Ensure to check for pipes and/or cables in the mounting surface prior to mounting.
2. Once done, drill small holes into the surface that the 45 Key Safe is up against.
3. Push wall anchors into each of the holes, ensuring they go in as far as they can.
4. Screw the wall screws into the wall anchors and the drill both into the surface.

Once completed, make sure that the 45 Key Safe is secured correctly to the desired surface. You can do this by attempting to move the safe.

## Setting Combination Lock

To set the combination lock code, first open the box.

Then, set the small switch on the inside of the lock to the “B” position. This is the position it needs to be in whilst you set the lock.

Whilst the switch is in the “B” position, move the numbers to the combination you wish for the lock to be.

When done, simply move the switch back to the “A” position and your lock is set, only your chosen combination will open the case.

## CONSIDER THE ENVIRONMENT!

In the United Kingdom, approximately 5 billion corrugated boxes are used per year, amounting to around 83 per person! By recycling the cardboard box in which this product was packed, you contribute to the preservation and sustainability of the environment.

If you see a recycling logo on the packaging of your product, such as the below examples, that piece of packaging is recyclable. If there is not a recycling logo, please check with your local authorities before recycling.

PLEASE RETAIN A COPY OF THESE INSTRUCTIONS FOR FUTURE CONSULTATION
