## Safety Information

### Please ensure you read and fully understand instructions before use

While every attempt is made to ensure the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, which no representative of the company can waive or change.

- 
- This product is not a toy, and is only to be used for its designated purpose.
  - Make sure all fastenings are tightly in place and that everything is in order before using the product. This should be checked periodically by an adult.
  - Leaving the product outside exposed to weather, especially direct sun and rain, will speed the weathering process. This can be slowed by removing the product from these conditions, or covering it with a suitable cover.
  - To protect against electrical shock, do not immerse cord, plug or any part of this appliance in water or any other liquid.
  - Please ensure the 12V plug is disconnected from the DC socket after the car engine is turned off.
  - Do not switch the setting from cool to warm immediately. Change between the settings only after the cooler has been OFF for 30 minutes.
  - Do not turn the cooler upside down and avoid dropping the cooler.
  - Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
  - Please note raw food or seafood cannot be put in this appliance directly. Individual packaging for these types of foods are required.
  - Prevent any obstructions to the fan. If the fan becomes blocked, it can overheat and cause fire. Never cover with towels or cloths.
  - If the product is damaged or has any defects, please contact [cservice@oypla.com](mailto:cservice@oypla.com)
  - Ensure the power supply to the socket into which the appliance is plugged, is in accordance with the rating label on the appliance and that the socket is earthed.
-

# What's In The Box?

Please note that you will be referring to the below parts list during assembly

If any of the below parts are missing or damaged, please contact our dedicated team at [cservice@oypla.com](mailto:cservice@oypla.com).

---

# Operating Instructions

The below information is designed to help you with the operation of your Oypla product

If the product is damaged, defective or you require more information, please contact our dedicated team at [cservice@oypla.com](mailto:cservice@oypla.com).

---

## Functionality

This mini thermoelectric cooler and warmer can bring you cool drinks in the summer and warm food in the winter. No matter whether on a long car journey, or outdoor hiking stuck in your car, you can enjoy plenty of drinks and foods at their optimum temperature.

It integrates dual functions of cooling and heating by employing a semiconductor, without compressor or cryogen. It has advantages of being free from pollution (no harmful gasses), small volume, light weight, portable, long service life and lowest power consumption.

## Ideal Uses

Barbecues	Picnics	Road Trips	Fishing
Taxi Driving	Truck Driving	Camping Trips	Dorm Halls

## Performance

For optimum cooling effect, we suggest using pre-chilled foods and drinks.

This cooler and warmer is not designed to heat cold food, but to preserve hot foods at a warm temperature. It can warm to the maximum 65°C.

Please note the appliance is not suitable for storing ice cream or to freeze food or beverages.

## Operation

First make sure the switch at the side of the cooler and warmer is in OFF state, and then insert the plug of the power cord into the socket of the unit.

Insert the plug of the cigarette lighter into the cigarette lighter in the car.

**Cooling:** set the power switch at the position of COOLING. The green indicator will be on indicating the unit is in cooling mode.

**Heating:** set the switch at position of HEATING. The red indicator will be on indicating the unit is in heating mode.

---

## Attachment

## DC Power

Note that power is drawn from the vehicle's engine. Simply insert the power cord attachment into the cigarette lighter port in the vehicle.

---

## Technical Data

---

- Voltage: 12V DC
  - Cooling range: 18-20°C
  - Heating range: 50-65°C
-

---

# Troubleshooting

---

- If the appliance is not cooling or heating:  
Check if the fan is operational, if it is not check that the connections are firmly in place.  
Use a non-metallic brush to clean the connections.  
Check that the fuse has not blown and that the power source is switched on.
  - If the appliance does not cool and the fan is not rotating, this indicates the motor may be at fault.
  - If the appliance does not cool but the fan is rotating normally, this indicates the cooling system may be at fault.
  - If the appliance does not work at all when connected to the DC Power source, this indicates the integrated power system may be at fault.
-

## Consider the Environment!

By recycling the cardboard box in which this product was packed, you contribute towards helping the environment. If you see a recycling logo such as the below on the packaging, it can be recycled. If a recycling logo is not present, please check with your local authority before recycling.

---

## Environmental Protection

Products bearing the symbol shown below means that used electrical and electronic equipment (WEEE) should not be mixed with general household waste. For proper treatment, recovery and recycling, please take this product(s) to designated collection points where it will be accepted free of charge. Disposing of this product correctly will help save valuable resources and prevent any potential negative effects on human health and the environment, which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point. Penalties may be applicable for incorrect disposal of this waste, in accordance with your national legislation.
