

Irrigation Kit

Safety Instructions

Notice: Ensure you read and fully understand instructions before use

While every attempt is made to ensure the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, which no representative of the company can waive or change.

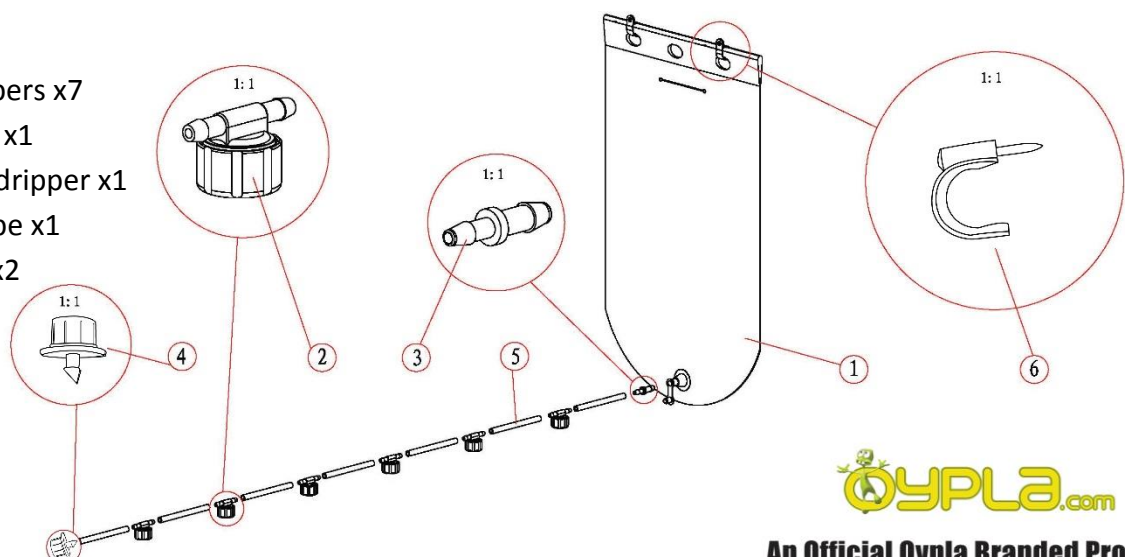

- Take care when cutting the watering tube.
- This product is not a toy, and is only to be used for its designated purpose.
- This kit is designed for use with water only. Other chemicals may damage this product if used.
- If the product is damaged or has any defects, please contact cservice@oypla.com

Operating Instructions

1. Fix the bag to hanging hooks through the holes at the top of the bag. (If there is no place available to mount the hanging hooks, a piece of string looped between both holes can also be used.)
2. When fixing the water bag into position, ensure that the bag will be at the same level as the drippers. This system works best at a low water pressure.
3. Insert the tube connector into the valve at the base of the water bag. Do not forcibly push the connector into the valve.
4. Connect the watering tube to the connector.
5. Mark 6 points along the tube where you wish to mount the drippers. Ensure that there is at least 1.5m of tube between the water bag and the first dripper.
6. Cut the tube at the marked points and insert each dripper along the length.
7. Seal the end of the tube using the end dripper.
8. Check that the tube has not become kinked as this may reduce or cut off water flow.
9. Fill the water bag through the opening slit at the top of the bag.
10. Carefully open each of the adjustable drippers to your required drip rate. Do not set the drip rate slower than 1 drip per second as there will not be enough pressure to empty the water bag.

CONTENTS

1. Water bag x1
2. Adjustable drippers x7
3. Tube connector x1
4. Adjustable end dripper x1
5. 6m watering tube x1
6. Hanging hooks x2
