Safety Instructions

Notice: Ensure you read and fully understand instructions before use

While every attempt is made to ensure the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, which no representative of the company can waive or change.

- Make sure all fastenings are tightly in place and that everything is in order before using the product. This should be checked periodically by an adult.
- Unpacking, installing and fixing the parts are to be completed by an adult.
- This product is intended for outdoor use only.
- This product is not a toy, and is only to be used for its designated purpose.
- Do not carry out alterations or modifications to this product.
- This product is not suitable for children.
- Clean only with a damp cloth. Do not use strong industrial cleaning substances.
- This product is not suitable for use in high winds as this may result in personal injury and/or product failure.
- Leaving the product outside exposed to weather, especially direct sun and rain, will speed the weathering process. This can be slowed by removing the product from these conditions.
- Only use this product on stable and level ground.
- Do not discard any of the packaging until you have checked that you have all of the parts and fittings required.
- Keep away from fire.
- Do not lean or put a lot of pressure against the fruit cage as this may result in personal injury and/or product failure.
- If the product is damaged or has any defects, please contact cservice@oypla.com.

Warning

 Where possible, do not use this product in areas which are exposed to high-speed winds.

1

Using a straight connector (b), connect two short poles (j). There should be enough connectors and poles to do this 6 times.

2

Create the foundations of the cage, as per the below diagram.

3

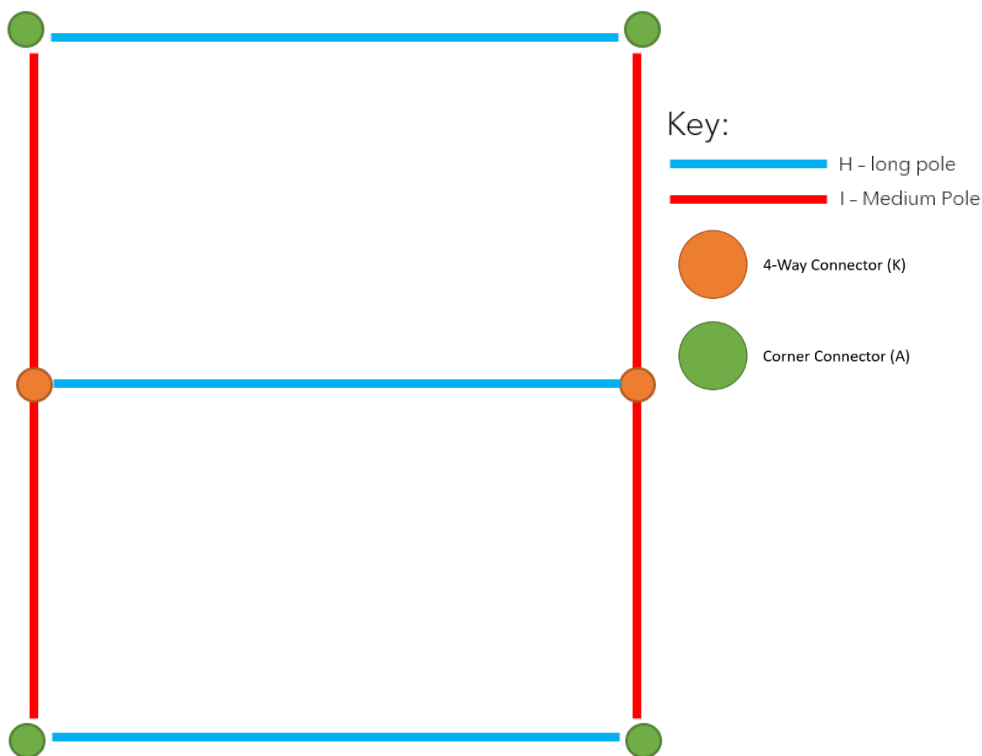

Place the 6 sets of 2 x short pole + 1 straight connectors that you created in step 1 into the 6 upward holes created in step 2. You should now have a foundation with 6 poles vertically placed.

4 Finish the top layer of the cage, by following the diagram below. The below diagram is from an aerial perspective and is on top of the 6 poles sticking upwards from step 3.

5 Use the small netting to cover the top of the cage, and the large netting to surround the sides of the cage. The large netting should be placed in a way that means there is a central point where the two ends meet, which can be opened to check on your vegetables or plants inside.

Fasten the nets into place using the cable ties provided. Where the two ends meet, fasten with the velcro straps provided. This will allow you to undo them and enter to check on the contents easily.

CONSIDER THE ENVIRONMENT!

In the United Kingdom, approximately 5 billion corrugated boxes are used per year, amounting to around 83 per person! By recycling the cardboard box in which this product was packed, you contribute to the preservation and sustainability of the environment.

If you see a recycling logo on the packaging of your product, such as the below examples, that piece of packaging is recyclable. If there is not a recycling logo, please check with your local authorities before recycling.

PLEASE RETAIN A COPY OF THESE INSTRUCTIONS FOR FUTURE CONSULTATION
