Safety Information

Please ensure you read and fully understand instructions before use

While every attempt is made to ensure the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, which no representative of the company can waive or change.

- This product is not a toy and should only be used for its designated purpose.
 - Make sure that the racking platforms are secure before applying any weight to the product.
 - This product can be used both indoors and outdoors.
 - Leaving the product outside exposed to weather, especially direct sun, rain and salt air, will speed the weathering process. This can be slowed by removing the product from these conditions, or covering it with a suitable cover.
 - Do not carry out alterations or modifications to this product.
 - Clean only with a damp cloth. Do not use strong industrial cleaning substances or abrasive materials as these will damage the product.
 - **Warning! Beware of sharp parts! This product contains sharp parts and edges that can cause personal injury. Ensure appropriate PPE is worn when using or assembling the product.**
 - Do not discard any of the packaging until you have checked that you have all the parts and fittings required.
 - When adjusting the height of the shelves, be sure that the shelving is securely held in place after adjusting the height to avoid it falling due to weight.
 - Never exceed the maximum load capacity of 100kg per shelf or it may result in product failure or personal injury.
 - Only use this product on stable, level and dry ground.
 - This product contains sharp parts and edges. Please ensure appropriate PPE is worn during assembly and use to avoid personal injury.
 - If the product is damaged or has any defects, please contact cservice@oypla.com.
 - **Warning! Do not exceed the maximum weight of 500kg or 100kg per shelf. Overloading can cause product failure and/or personal injury.**
-

What's In The Box?

Please note that you will be referring to the below parts list during assembly

If any of the below parts are missing or damaged, please contact our dedicated team at cservice@oypla.com.

Wooden Shelf  5pcs	End Adjustment Bar  10pcs
Side Adjustment Bar  10pcs	Plastic Feet  8pcs
Corner Support Bar  8pcs	Corner Extender  4pcs

Assembly Instructions

Please refer to the below information to help assemble your Oypla product

If you require assistance with the assembly of your Oypla product, please contact our dedicated team at cservice@oypla.com.

ASSEMBLY INSTRUCTIONS BEGIN ON FOLLOWING PAGE

1

Take two corner support bars and place plastic feet on the bottom of both. After this, lay both corner support bars side to side and slide an end adjustment bar into place. Make sure the metal folds on the end adjustment bar go underneath the metal holds on the outside of the corner support bar.

Once the end has been finished, slide a side adjustment bar into place on either side of the created frame. Make sure the metal folds are on the outside. Repeat this on the opposite side. After both sides are secured into place, repeat step one and then attach that to the opposite end of the side adjustment bars.

2

3

Place a wooden shelf onto the first of the racking platforms. Slide a side adjustment bar higher up either side of the frame and an end adjustment bar to either end of the frame. Once this is done, place a wooden shelf on top to create the second layer of racking.

4

Push a corner extender into each of the exposed corner support bar tops. Once done, slide a corner support bar onto the outside of the corner extender. Make sure this is held securely as this area will be holding the weight of the racking above. Repeat this with the remaining corner support bars.

5

Repeat the previous steps for constructing the racking supports. Once you've built the centre racking platform, continue building upwards. Maintain a fair amount of space between each racking platform, this will allow for better storage. Once you have completed the 500kg racking, go over all the secured metal folds to make sure that the racking is secure.
